

Going into the winter heating and holiday season, the La Crosse Fire Department would like to remind La Crosse residents to be fire safe.

Remember to:

- Test your smoke alarms to ensure they're working
- Never leave the kitchen while cooking
- Keep candles at least 12 inches away from anything flammable
- Have a home escape plan with two exits out of every room
- Plug space heaters directly into an outlet - do NOT use extension cords with space heaters

Head over to NFPA.org for more information on holiday fire safety.
